

Metal Free Brushes

FUSED BRISTLES MINIMIZE THE POTENTIAL FOR TRAPPING BACTERIA AND CONTAMINANTS

Innovative Products that **Clean Better** and **Last Longer**™

- FDA Compatible
- Chemical Resistant

- 100% Food Grade Polypropylene Brushes
- Excellent stiffness even when used wet/in water
- Will **not scratch** most surfaces
- Comes in a **variety of configurations** and stiffness
- **Clean inside** valves, fittings, shafts, and hozzels

Flexible Series

- Flexible Stem
- Used to clean inside of both straight and curved pipes and tubes

Cleaning tools that do the job for which they are intended™

Standard Series

- Semi-flexible stem
- Used to clean inside of pipes and tubes with a gradual bend

Rigid Series

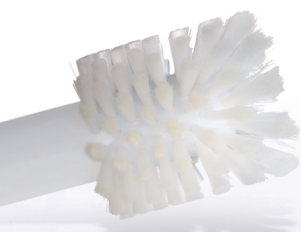

- Rigid stem
- Used to clean inside of straight pipes and tubes

Double Leader Series

- A push/pull through brush
- Great for food service; especially to clean ice cream, yogurt and liquid dispensing machines

Bore Brushes

- Hand or machine operated
- Cleans wall and bottom of a larger diameter tubes, pipes, or holes
- Used when a spiral brush is not strong or thick enough to provide sufficient abrasion

Metal Free Brushes can be used when **aggressive scrubbing** is needed; when you cannot use a brush with ANY metal components

Metal Free Brushes can be used in the following industries:
Food Service, Pharmaceutical, Laboratory, Medical, and Hospital

CUSTOM Metal Free Brushes

also available in any size, length, stiffness, and configuration to meet your needs.
