

# PIZZA OVEN BRUSHES

Innovative Products that **Clean Better** and **Last Longer**™

Finally, someone has made a well-built, durable, and light-weight pizza oven brush. But that's what you would expect from Milwaukee Dustless Brush, the leader in cleaning tools since 1897!

The head, made of strong hardwood is set with sturdy but gentle flared brass-bridles that allow the brush to sweep 8" of space at a time. Use this brush to collect ash from between hearth bricks and the smallest crevices of your oven. You will love how gentle and thorough it sweeps and cares for your hearth. The adjustable head swivels to adjust to ANY oven shape - and sweeps with a FIRM motion. Angle the head straight in-line with the handle, or swivel it perpendicular to sweep and drag ash or push small coals. Head adjusts 360 degrees.

Brush has a heavy-duty aluminum handle (which will not get burned from the heat of your oven like wood handles and it cools off quickly),

**Available in 3 sizes: 48", 60", and 72".**

*Cleaning tools that do the job for which they are intended™*

Dual headed pizza oven brush has soft crimped brass bristles which can be used on ceramics without damaging its surface. It features a wooden T-shaped block which gives this brush two different sized heads, allowing the user to clean large and small spaces with ease.

This brush can be used at **temperatures up to 500°**. This brush is great for quick and easy removal of carbon deposits, rust, and burned-on food build up. Uses Milwaukee Dustless brush ACME threaded handles.
