

# Speed Squeegee®

## Heavy Duty Steel

Speed Squeegee® has a steel socket that accepts any Speed Sweep® bolt-in handle, providing a positive connection that won't come loose. Available in a full range of styles such as zinc plated steel and anodized aluminum frames, straight and curved, with stiff neoprene or soft moss rubber blades for superior surface contact.

### FEATURES

- Straight heavy duty steel with tough neoprene blade
- Curved heavy duty steel
- Flex Squeegee™ steel frame with double moss rubber blade
- Flip Flop® aluminum frame with split neoprene blade
- Straight aluminum frame with pliable, non-marking blade
- Curved aluminum frame

### BENEFITS

- Long wearing under heavy use
- Curved frame improves water retention
- Excellent floor contact for reduced drying time
- Special Flip Flop® socket allows forward and backward strokes in obstructed areas
- Lightweight alternative with anodized aluminum frame

## Speed Squeegee® heavy duty steel frame

### STRAIGHT HEAVY DUTY

Speed Squeegee® floor squeegees manufactured with heavy gauge zinc plated steel. Genuine neoprene blade has excellent wearing qualities. Steel handle socket accepts any Speed Sweep® bolt-in handle with 3/8" stud. (All steel #190300 or #191400 handle recommended for 30" and 36" squeegees.)
